DEDUST BENCH Aspirated work surface for fine dust extraction

AIR FILTRATION SOLUTIONS

SUCTION UNIT

Vacuumed work surface with integrated suction on both the surface and the back wall. Designed for fine dust extraction and dedusting of workstations. Made of galvanized steel, sturdy and suitable for harsh environments. Hinged and removable side screens for more effective airflow management. Available in three versions (DB 1000 - DB 1500 - DB 2000) to fit any space. To be connected exclusively to a Dedust vacuum cleaner with a capacity of 2,000 to 3,300 m^3/h depending on the model.

COLLECTION UNIT

Built-in catch basin easy to empty.
